## Our mission

Conservation Evidence is a free, authoritative information resource designed to support decisions about how to maintain and restore global biodiversity.

## Conservation Evidence journal

A unique open-access journal publishing research and case studies that measures the effects of conservation actions.

## Synopses

*What are synopses?*

# Tangential to this study:

- Develop 'key questions' paper through separate convened meeting in Tomso in June 2014
- Collaborate with Bill Sutherland
- Becomes prioritization tool for policy makers and funders

# What are the key questions?

- **Habitat effects**
- **Faunal response**
- **Gear effects**
- **Habitat x gear interactions**
  - **Specific parts of gear**
- **Resilience**
- **Intensity and frequency**
- **Recoverability**
- **Best management measures to mitigate**
- **Indicators/measures**
