

2024 HDR Scholarship Program

Water

About HDR

We specialize in **engineering, architecture, environmental and construction services**. While we are most well-known for adding beauty and structure to communities through high performance buildings and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include scientists, economists, builders, analysts, and artists. Our employees, working in more than 200 locations around the world, **push open the doors to what's possible each and every day.**

About this Scholarship

Our scholarship committee will grant **two \$10,000 scholarships** to two exceptional graduate-level students, preferably enrolled in a civil, environmental or other related engineering discipline associated with the water engineering industry. We will give preference to students with a proven interest in water, wastewater or water resource engineering. Along with the scholarship, the student must be willing to accept a paid internship. We will determine the location of the internship by matching the interest of the student with an HDR office that offers a strong mentoring opportunity for a future water engineering professional. Housing and transportation are not provided for the internship.

How to Apply
