

Responsible AI Systems & Experiences (RAISE) at the University of Washington presents:

Liz O'Sullivan, CEO of Parity

Friday Oct 22, 2021, 9-10am PST

Join via this zoom link: <https://washington.zoom.us/j/94636255672>

Since earning her degree in Philosophy at UNC Chapel Hill, Liz has spent her career of 10 years in AI startups in NYC tech, most notably at computer vision company Clarifai where she first spoke out publicly about the dangers of AI in military and law enforcement. After quitting her position as head of annotations over ethical concern, Liz joined two organizations intending to make the world safer and less discriminatory by limiting the use of AI while installing safety constraints to protect those most at-risk from AI harm. She was the first staff member, the Technology Director, for New York nonprofit Surveillance Technology Oversight Project ([STOP](#)) and cofounder / VP of Responsible AI at AI Explainability and model monitoring company [Arthur](#). Liz left Arthur and STOP in May of 2021 to take over Dr. Rumman Chowdhury's [Parity](#), announced in June 2021.

RAISE is a UW-wide group of students and faculty interested in the broad space of responsible AI, trustworthy machine learning, human-centered computing and data science. As part of this group, our mission is to engage in scholarly, educational, and outreach activities that lead to foundational research in these areas.

RAISE fall quarter events also include:

10/29: [Keegan Hines](#), Vice President of Machine Learning at [Arthur](#).

11/5: Principal Researcher [Ece Kamar](#) et. al. from Microsoft Research.

11/12: [Mona Diab](#), Computer Science Professor at George Washington University.

11/19: [Yunhe Feng](#), UW Data Science Postdoctoral Fellow.
