

Final Presentation Schedule

SEFS 502 - Analytical Techniques for Community Ecology
Winter 2018

Presentations are in **Anderson Hall, room 022.**

All are welcome to attend!

Friday, March 9, 2018

Start Time	Speaker	Title
9:05	Sarah Harrison	Understory response to high severity fire
9:20	Vivian Griffey	Biophysical drivers of boreal and temperate forest carbon fluxes
9:35	Sheila Goodman	Graphene decorated wood filters for sustainable water purification
9:50	Caileigh Shoot	Identifying forest type using hyperspectral and LiDAR data in interior Alaska
10:05	Pranjal Dwivedi	Nutrient cycling and wood chemistry characteristics of Douglas-fir stands in western Washington
10:20	Fletcher Harvey	Environmental influences of canopy biomass allocation in coastal Douglas-fir
10:35	Korena Mafune	Canopy and forest floor soil microclimate comparison of old-growth big leaf maple in a temperate rainforest

Wednesday, March 14, 2018

Start Time	Speaker	Title
8:35	Robert Swan	Stand density metrics as predictors of out of roundness of western hemlock
8:50	Roxana Rautu	Winter stream temperature variability on the Olympic Peninsula
9:05	Mary Fisher	Assessing stock structure of Pacific cod by combining ecological and evolutionary perspectives
9:20	Olivia Jacobs	Homebuilder revenue distribution and green building projects
9:35	Samantha De Abreu	Fire impacts on nitrogen cycling in boreal forest ecosystems
9:50	Jonathan Batchelor	Small mammal habitat detection with TLS
10:05	Michelle Agne	Drivers of post-fire species composition shifts in subalpine forests following high severity fire

Notes for students:

1. All presentations are 13 minutes, with 2 minutes for questions. Please do not plan to exceed your scheduled timeframe - you will not be allowed to do so!
2. PowerPoint presentations can be loaded ahead of time by emailing them to Jon or bringing them on a thumb drive to class (arrive early if you do so!)
