

AGREEMENT ABOUT THE USE OF DATA AND METHODS

This is to acknowledge that I, _____, will not use any of the data available at the University of Washington Urban Form Lab (UFL) without explicit permission from Prof. Anne Vernez Moudon and the various collaborators on the UFL research projects. Neither will I provide or facilitate access to these data to anyone else.

Explicit permission will be needed for use of the data in personal (class or coursework related) projects, theses or dissertations, whether these works are submitted for publication or not.

When permission to use the data is provided, I agree to keep the data in a secure (password enabled) electronic environment. I also agree to acknowledge the sources of the data in any and all of the material I write based on the data or methods, whether it is formally submitted for publication or not. Furthermore, I agree to use standard text as found in refereed academic journals to acknowledge data sources and related research methods, including naming (1) the appropriate institutions involved in generating the data or the methods, (2) the institutions that funded the development of the data or the methods, and (3) the research project Principal Investigator.

I understand that not following the above procedure constitutes a violation of standards in academic research. I also understand that this agreement applies whether or not I am employed by the UFL, and continues after I am no longer associated with the UFL.
