

BIO ENGAGE

UW Bioengineering Industry Engagement

2023-2024 Academic Year

SUPPORT BIOENGAGE

By supporting BioEngage, companies not only make a powerful impact on UW Bioengineering students, but also join an influential UW ecosystem of student talent, faculty research, and industry leadership.

BIOENGAGE PARTNER | \$5,000

A gift of \$5,000 supports:

- 400+ students participating in networking events, career education, and professional development
- Educating students on the current industry landscape and technologies
- Students finding their first career destination upon graduation
- Graduate leadership development through student management of BioEngage

Out of gratitude for the key role of industry partners, we look forward to involving our partners in programming throughout the year and recognizing our partners through logo placement on our website and digital communications. We also welcome support at other donation levels.

Reach out at uwbioengage@uw.edu to learn more about partnering this year!

Connecting UW Bioengineering to Industry

BioEngage connects the biotech and medical device industries with UW Bioengineering trainees and faculty to build **meaningful, mutually beneficial**, and **sustainable** relationships.

MIXERS

We host three annual large-scale networking events:

- **Fall and Winter Mixers:** career fair-type events geared towards our undergraduates seeking internships and full-time positions.
- **Spring Happy Hour:** informal networking event for graduate students and post docs.

Our 2022-2023 Mixers were a huge success. Last year, we hosted three events scheduled around the industry hiring cycle, reaching about 200 students. Contact us to participate in our **Fall 2023 Mixer on October 19th!**

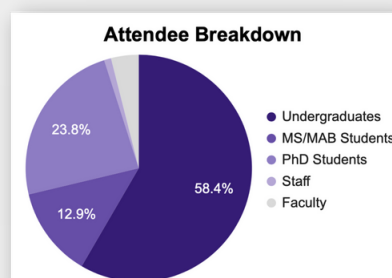

COMPANY SPECIFIC EVENTS

Companies can also engage with the UW Bioengineering community through dedicated seminars or facility site visits. In the 2022-2023 year, we hosted six events tailored to individual companies. Reach out via email to plan a tailored company event for the upcoming academic year!

We hosted a range of events last year including seminars from Fortem IP (left) and Abbott Laboratories (center) as well as site visits to LifeNet (right) and other local companies.

UW Bioengineering undergraduate and graduate programs are consistently ranked highly amongst the nation's biomedical engineering programs by US News and World Report. The program enrolls 221 undergraduate and 195 graduate students.

Our events attracted over **400 attendees** this last year! Of graduating undergraduates who attended BioEngage events in the past year:

- **56%** reported that events helped them learn about careers in industry
- **32%** made connections with industry professionals
- **3%** got a job or internship through BioEngage events and postings
