

Virtual Fellows Handbook Hematology-Oncology Fellowship

September 2021

Program Comments:

- This is our program's second year using an app/service called "DocLauncher" as our virtual fellows handbook: <https://doclauncher.com/>
- Not sure if it is the best tool out there, but it is working well for us.
- Pricing is per user and is based on data in the app, ours is \$3 mobile user/month.

Some plusses of the service are:

- It is searchable (i.e. pull up everything related to "VA Parking")
- Easy to change roles: we can easily set each years' handbook update committee of fellows administrators so they can make their own edits
- Info is downloadable so it is available offline (aka in the bowels of UWMC or in a dead zone at the VA)
- Edits can be made any time, and you can push a notification out prompting folks to update their offline downloads
- Allows for PDF and video uploads
- Their support team is excellent, they are working on implementing a tool that my fellow reps suggested to them where users can flag a page or item in need of an update that will then be sent to the administrators of the handbook
